MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Barracks Mid-Program Review Report

1. A joint OACSIM and HQUSACE Barracks Team has completed their report on the Barracks Mid-Program Review (Enclosure 2). The report provides ample support for a new barracks design strategy that eliminates restrictive criteria and incorporates, to the greatest extent practical, industry standards for both functional and technical criteria. The new strategy also includes greater emphasis on flexibility because of the dynamic nature of the Army's force structure. Greater use of industry standards should provide a greater value to the Army and provide a boost in soldier well-being, all without an increase to the current program funding.
2. A new Barracks Complex Standard Design Subcommittee has been established to develop an implementation plan for the subject report, and make recommendations to the DA Facilities Standardization Committee. This new Subcommittee, which will be co-chaired by OACSIM and ODCSPER, will include representatives from the previous Standard Design Subcommittees for Barracks (including soldier community buildings), Company Operations Facilities, Brigade & Battalion Headquarters Buildings, and Enlisted Personnel Dining Facilities. Enclosure 1 has a list of members on the new Subcommittee.
3. A meeting of the Barracks Complex Subcommittee will be held in Washington DC to discuss the report recommendations and develop an implementation plan (Enclosure 1 has location and date). We look forward to your support for these recommendations, which we believe are consistent with the high priority that barracks modernization has with the Army Leadership. Additional copies of the Barracks Mid-Program Review Report can be downloaded from the USACE Barracks Corporate Lessons Learned website at <http://cadlib.wes.army.mil/html/cos/cfusion/mainpage.htm>. POC is Mr. George Mino, P.E. at DAIM-FD, 703-428-7708, Fax x8158, DSN 328, george.mino@hqda.army.mil.
4. Quality Facilities for Quality Soldiers!
